

Compact Bearing S 65

Static elastomeric bearing for structural members

SPECIFICATION TEXT

Calenberg Compact Bearing S 65, unreinforced, highly ageing resistant EPDM elastomeric bearing, can be loaded to an average compressive stress $\sigma_{R,d}$ of up to 14 N/mm², ozone resistant, general technical approval no. Z-16.32-474

A. Standard installation

Length: mm
Width: mm
Thickness: mm
Quantity: Item

B. Point bearings embedded in polystyrene or Ciflamon fire protection board

Overall length: mm
Overall width: mm
Elastomer length: mm
Elastomer width: mm
Thickness: mm
Quantity: Item

C. Strip bearings embedded in polystyrene or Ciflamon fire protection board

Overall width: mm
Elastomer width: mm
Thickness: mm
Quantity: Item
